Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 29 “the engine or machine” lacks antecedent basis. In claim 30, the core is cited as comprising a housing. However, this is not what is shown in the Figures.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 29-31 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Irvin, Jr. (3,613,653). Note a method comprising the steps of providing a core 80 having a semi-annular cross-section, the core defining a channel adapted to receive a high tension spark plug lead of an engine, locating at least part of the spark plug lead in the channel, retaining the core and the high tension lead in a position with respect to each other, and applying electricity to the spark plug lead to generate an electromagnetic field in the core which radiates from the core to act as a fuel in the engine and to generate a spark for burning the fuel, a housing including an upper and

lower housing element 30, and the core being positioned within the housing, the housing being formed of a non-ferrous material. Irvin, Jr. shows everything except specifically citing that the core is formed of a material exhibiting ferrimagnetic properties and the housing having an upper cover pivotally connected to the lower housing element. It would have been an obvious matter of design choice to utilize a material exhibiting ferrimagnetic properties, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416, and to employ a housing having an upper cover pivotally connected to the lower housing element, since the device would function in the same way regardless of the housing configuration.

Allowable Subject Matter

Claims 32 and 42 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
